

Revolutionary Eco-Friendly 100% Natural, Sustainable Hygienic Coconut Fiber Animal Bedding

The best horse bedding on the market!

Advantages of COCOMFORT™

- Extraordinary absorption capacity. Absorbs up to nine times its weight. The higher the absorption, the longer it will last and less to buy
- Eliminates unpleasant urine odors. Reduces flies & pests
- Minimizes formation of ammonia and toxic sulphur compounds. Reduces the fermentation of urine
- Offers optimal phyto-sanitary conditions and prevents onset of serious diseases. Protects hoof health.
- Soft and hygienic bedding. Prevents limb and ligament tiredness thanks to the soft and spongy nature of our product.
- No risk of splinters or edges poking out
- Good insulation capacity providing thermal control during cold winter and blazing summer heat
- Decrease labor requirements in the daily work
- Make grooming easier. White or gray horses do not turn yellow as a result of ammonia attack.
- Cost-efficient. Economical to use in the long run
- Reduce volume of less bedding waste material – easily compostable
- Lasts much longer than shavings and requires less product
- Germ free
- Free from fine dust particles
- Free of moulds and allergens
- Consequently best for allergic and sensitive horses and staff
- Does not appeal to animals and therefore is not ingested
- Eco-Friendly, 100% Natural, Organic, Biodegradable
- Sustainable animal bedding from pets to farm animals
- Can be used in alleyways and livestock transportation to stop slipping and keep animals cleaner
- Happier animals lead to higher productivity
- At the end, reuse in garden as an ideal soil amendment and a nutrient-rich fertilizer
- COCOMFORT™, the best bedding that fits best with your needs.
- We are here to give you solutions! We customize product to your needs!
- You can mix with your traditional product and use a bit more of COCOMFORT™ and when it is time to replace use less of your old bedding and add more of our product until the moment that you will see it to believe it that COCOMFORT™ IS YOUR SOLUTION!

*"A dog looks up to a man,
A cat looks down on a man,
But a patient horse looks at a man
In the eye and sees him as an
equal"

Beneficial effects for healthy horses

COCOMFORT™ Our revolutionary eco-sustainable option, free from chemicals, additives, dust and disease. All from the coconut husk (coir) formulation that can substitute wood bedding products and peat moss that are indeed an alternative to destruction. The extraordinary absorption capacity of COCOMFORT™ efficiently binds urine and there prevents wet spots on the box and

Due to its sophisticated natural nature of the product it is the only bedding material that minimizes unpleasant urine odor by decreasing the formation of ammonia and toxic sulphur compounds. Health of respiratory tract and hooves is protected.

COCONUT – COCOMFORT™ Absorbs 9X times its weight

■ Absorbs X times its weight

* S.Molnar, 2006, University of Guelph, Guelph, Ontario and Dr. Bob Wright, Ontario Ministry of Agriculture, Food and Rural Affairs, Fergus, Ontario, Canada

COCOMFORT™, As a growing medium and an bedding absorbent, coconut coir is a superior alternative to peat moss and wood products. What's is more incredible is that it's completely sustainable.

“Nature is our source of Inspiration, Hope, Peace, Respect and Goodness” – This is our corporation approach we believe in and are committed to.

The soft, spongy properties of COCOMFORT acts as a mattress and encourages the stalled horse to lie down and relieve the constant pressure of his body weight on legs and feet. Does not stick to hair and is more comfortable than straw or wood-based bedding, as well as taking in health considerations

What is now needed is a change in your mindset in favor of accepting an alternative strategy for sustainable and with the best result in absorption in the industry of Animal Bedding.

“A new type of thinking is essential if mankind is to survive and move toward higher levels.”
~ Albert Einstein

COCOMFORT™ your solution!

Best for horses with allergies and respiratory sensitivities The only complete bedding solution

Revolutionary Eco-Friendly 100% Natural, Sustainable Hygienic Coconut Fiber Animal Bedding

The best horse bedding on the market!

Advantages of COCOMFORT™

Financial benefit

Higher the absorption longer the product will last as an animal bedding.

The significantly reduced need for top-dressing and the decreased daily work load makes COCOMFORT™ a cost-efficient alternative to wood shaving or straw.

Other bedding products need to be purchased more frequently, and are more bulky so they take up significantly more storage room, whereas COCOMFORT™ is compressed into more manageable 24kg or 385kg bales. (3:1)

After use, it is great compost and can be disposed of with recyclable and organic materials.

Alternatively, it may be added to your compost pile or recycled into your garden as a precious soil amendment and fertilizer

Simple application and reduced labor

- For the first application we recommend 3 or 4 bales of COCOMFORT™ in order to be able to cover the complete surface of a standard box although each stableman will have different practices for each horse. Approximately one bale for each square meter of stable.
- Removing the solid parts only and in ventilating the wet part by handling a fork, in order to dry it and regenerate the coconut fiber.
- Depending on individual situation top-dressing of one bale (24kg approximately) every 10 days is recommended.

Sustainable

COCOMFORT, As a growing medium and an bedding absorbent, coconut coir is a superior alternative to peat moss and wood products. What's is more incredible is that it's completely sustainable

ECO-FRIENDLY

COCOMFORT will improve your factors affecting your animal bedding use and on the environment, while saving your money.
